

The Document Magic System

www.umango.com

Improve Intelligent Document Processing and Productivity!

Umango streamlines document capture, indexing, conversion, and storage, driving productivity through intelligent automation and seamless integration with your backoffice business systems.

Documents can be profiled at supported MFDs or within a browser, allowing flexibility in where and how data is captured. Once processed, documents and data can flow directly into databases, network folders, the cloud or a whole host of back-office systems. Umango's powerful IDP features include zonal OCR, advanced metadata import, regular expressions, and OMR, with Umango's own AI-driven image analysis that lets users make decisions based on image content.

Data capture tools include zonal OCR, regular expressions, OMR, barcode, data lookups, fields identified using AI, key from image, and constrained lists. Standard features include image enhancements, flexible document separation options, automation processing, scalability.

Designed for scalability and ease of use, Umango is ready to handle a range of use cases, from automated invoice processing to high-volume data extraction, with support for prioritizing document sources.

Ask AI

Use natural language to tell AI how to capture and query your data

Convert Formats

From virtually any image format, create accurate, editable documents

Capture Data

Assign meta data to your documents automatically or manually - you decide

Highly Scalable

From just you to a workforce of 1000's, we have the solution for you

Flexible Product Feature Tiers

Whether you just need the essentials or require the full suite of advanced AI features, Umango has the right fit for you!

Cloud, on-premise and hybrid installation options, together with flexible deployment platforms, provide the solution that fits into your organization's existing environment.

GENERAL	ESSENTIALS	STANDARD	PRO	ELITE
Scalable number of document sources	✓	✓	✓	✓
Scalable volume throughput capacity	✓		✓	✓
Scalable page limits	✓	✓	✓	✓
Effortless connectivity to supported MFDs	✓	✓	✓	✓
Embedded app available for supported copiers (MFDs)	✓	✓	✓	✓
Run processing as a background Windows service	✓	✓	✓	✓
Windows, AD, LDAP, Azure, Google and custom authentication	✓	✓	✓	✓
Authenticate into Umango at MFD panel	✓	✓	✓	✓

PROCESSING	ESSENTIALS	STANDARD	PRO	ELITE
Validate or enter data directly on the MFD panel		✓	✓	✓
Scalable # of processors to increase document throughput	✓		✓	✓
Option for fully automated processing (no user intervention)	✓	✓	✓	✓
Extract information using regular expressions or Smart Seek		✓	✓	✓
Read barcode values (1D and 2D)		✓	✓	✓
Auto document cleanups and filters (eg. delete blank pages)	✓	✓	✓	✓
Optical Mark Recognition (OMR - detect ink in a checkbox etc.)			✓	✓
Automatically or manually capture data while processing		✓	✓	✓
Process on a copier panel, web browser or tablet	✓	✓	✓	✓
Run custom scripts to enable unlimited flexibility			✓	✓
Use auto document classification to detect document types		✓	✓	✓
AP invoice data capture and processing				✓
Use AI to intelligently capture data based on a document type				✓
Capture and validate AP invoice line items				✓
Use natural language with AI to locate specific data				✓
Analyze, classify, interrogate and query document text using AI				✓
Interrogate or ask questions about a region of a document using AI				✓
Perform full document language translation				✓
Pre-trained or build-your-own AI document types				✓

IMPORT	ESSENTIALS	STANDARD	PRO	ELITE
Import XML metadata	✓	✓	✓	✓
Import email attachments	✓	✓	✓	✓
Document separator sheets (scan many documents at once)	✓	✓	✓	✓
Watch emails, folders and backoffice systems for new files and data	✓	✓	✓	✓
Batch coversheets (capture data to apply to a batch's documents)		✓	✓	✓
Capture from MFD, workstation, web browser or tablet	✓	✓	✓	✓
TWAIN scanner support (desktop scanners)	✓	✓	✓	✓
Manual document import from any/unlimited browsers	✓	✓	✓	✓
Import MS Office file formats (*.docx, *.xlsx, *.pptx etc.)	✓	✓	✓	✓
Import data and documents from legacy business systems	✓	✓	✓	✓
Automatically classify and route documents to the relevant job	✓	✓	✓	✓

OUTPUT	ESSENTIALS	STANDARD	PRO	ELITE
Convert to xlsx, docx, rtf, odt, html and more	✓	✓	✓	✓
Output to PDF/A and text searchable PDF/A	✓	✓	✓	✓
Export to network share	✓	✓	✓	✓
Browse export destination options during document profiling		✓	✓	✓
Export to essential export destinations*	✓	✓	✓	✓
Export to a wide range of extended export destinations+			✓	✓
Flexible connectivity using ODBC, scripts or Umango's SDK			✓	✓
Unlimited number of export destinations per workflow			✓	✓
Chinese, Japanese, Korean, Arabic, Vietnam, Thai OCR Languages	✓	✓	✓	✓
Export xml, json, text or any flat-file format			✓	✓
Translate source documents into virtually any language				✓

KEY/NOTES

* Exports to Network folders, xml, csv, email, OneDrive, Dropbox, Google Drive

+ Full suite of connectors and support for zone and export scripts

Professional and Elite tiers include 2 concurrent document processors as standard
